

# Botium Box Management Summary

September 2020

## Ensure your conversational AI works flawlessly in every situation!

Chatbots and Voice Assistants are taking Interactions between organizations and individuals onto the next level. The critical enabler in this success story is Testing. That's why we have built Botium Box to make testing and training of conversational AI fast and easy. Offering right now the world's most flexible continuous testing framework, supporting 30+ different Chatbot technologies to rapidly deliver a flawless digital experience to your users.

# Why use Botium Box?

## TESTING 100x FASTER

Chatbot Testing starts on API level. Testing conversations through an API is 100x faster and generates constant feedback for the development lifecycle.

## TESTING END-TO-END

After passing the API level, Botium moves on to the user interface. No matter if a bot implements a web, mobile or an audio interface.

## OUT OF THE BOX DATASETS

You got the bot? We have the tests. Botium Box comes with datasets for various chatbot domains. Save time designing and writing conversations.

## CONTINUOUS INTEGRATION

Botium fits seamlessly into your pipe. Botium integrates with common CI/CD pipeline tools to support continuous testing in every project environment.

## SECURITY TESTING

A security testset based on OWASP Top Ten combined with all conversations being sent through a ZAPProxy ensures highest standards.

## PERFORMANCE TESTING

Can your chatbot deal with multiple users? Running Stress and Load Tests through Botium Box will give you the answer.

## TEST DATA AUGMENTATION

Increase your test coverage by adding additional user examples to your test data. Just hit the "Paraphrase It!" button in Botium Box.

## DIALOG CRAWLER

The Botium Crawler records all paths for navigating through your dialog structure and saves them for running Botium tests.

## TESTCASE GENERATION

Save time by auto generating test cases and test sets out of the interaction model of your chatbot or voice assistant. Already supported for Watson, Dialogflow and Alexa.

## REAL DEVICE TESTING

For a real end-to-end testing experience, Botium Box integrates with various Device-Cloud-Providers like Saucelabs or Experitest.
